tested and

approved by four

major automobile

manufacturers.

Proven protection

for over

10 million vehicles

worldwide.

ZONYL® is a registered trademark of DuPont.
Only DuPont makes ZONYL®.

“NEXT GENERATION” PAINT SEALANT

R-2000® introduces a new generation of paint protection products made with DuPont™ ZONYL®. What is ZONYL®? ZONYL® is a DuPont trademark that refers to surface active agents, a class of chemicals developed by DuPont known as “fluorochemicals” that includes TEFLON® PTFE which was discovered by DuPont more than 60 years ago. ZONYL® surface active agents represent the latest advances by DuPont in fluoropolymer technology. ZONYL® surface active agents make it possible to achieve the highest levels of:

- Chemical and moisture resistance
- Oil/grease resistance
- Adhesion to low-energy surfaces
- Surface lubricity

R-2000® Paint Sealant with DuPont™ ZONYL® advantages:

- Builds customer satisfaction
- Increases trade-in value
- One treatment lasts five full years
- DuPont™ ZONYL® brand quality
- Helps prevent paint damage due to acid rain and chemical attack
- Five-Year Insured Warranty!
- Nearly 20 years of experience applied to millions of cars

Acid rain has been blamed for damaging the water quality of streams and rivers, roads and buildings and worst of all vehicles’ painted surfaces. Repainting an automobile damaged by acid rain can cost \$600 to \$3500 depending on the make and model of the automobile.

R-2000® Paint Sealant with DuPont™ ZONYL® surface active agents resists acid rain damage and we’ll guarantee your confidence in it for five full years.

“NEXT GENERATION”

R-2000® PAINT SEALANT Will Satisfy Customers With Paint Finish Protection Using DuPont™ ZONYL® surface active agents

R-2000® Paint Sealant works to keep a vehicle's finish looking showroom new by protecting it against deterioration by harsh car wash additives, strong detergents, oxidation and weather - especially ultraviolet radiation, acid rain and water spots.

There is no need for periodic “renewers” or “touch-ups” because R-2000® Paint Sealant with long lasting protection provided by DuPont's new ZONYL® surface active agents uses space age surfactant technology. It works well with the new generation of water based basecoat/clearcoat paints too. So well that several major automotive manufacturers have tested and approved its use.

Best of all, Paint Sealant with DuPont™ ZONYL® is available with a transferable Five-Year Insured Service Agreement. So customers will most likely be protected for as long as they own their car or truck.

PAINT SEALANT CLEANER

- Specially formulated to work with R-2000® Paint Sealant
- Helps customers keep their vehicles looking showroom new
- Keeps customers coming back

R-2000® Paint Sealant Cleaner was specially developed to clean vehicles treated with R-2000® Paint Sealant with DuPont™ ZONYL® without causing damage to the sealant coating.

Customers will be able to keep their vehicles free of stubborn dirt and residue caused by detergents, acid rain sediment, tar and tree sap and other environmental hazards which can leave

an unsightly “film” over the entire vehicle.

Plus, R-2000® Paint Sealant Cleaner gives customers one more good reason to return to your parts and service department for as long as they own their vehicle.

R-2000® VEHICLE PROTECTION PRODUCTS

R-2000® takes pride in manufacturing many of the highest quality vehicle protection products used in the automotive industry today. R-2000® products include upholstery and fabric treatment for car interiors made with DuPont™ TEFLON® textile finish to resist stains and paint protection made with DuPont™ ZONYL® surface active agents to resist environmental attack. Quality is also the reason R-2000® is able to offer a first-dollar insurance program. That means you're covered from the first dollar spent - no deductible! R-2000® vehicle protection products — a real value any way you measure it.

Service Agreement Information

- First Dollar-no deductible
- Five year full value repair or replacement on Paint Sealant, Fabric Protection, Leather and Vinyl
- Lifetime on Anti-Rust Compound and Undercoating
- Underwritten by a major insurance carrier holding an AXV AM Best rating
- All coverages are transferable at no charge
- Nationwide adjusting and repair services
- Coverages up to ACV of vehicle at time of repair
